EXPERTISE

- I am a software developer with a strong background in building web applications using ASP.NET Core, Entity Framework, and MVC architecture. My skills include:

- - **Backend Development**: Proficient in ASP.NET Core for developing RESTful APIs and implementing business logic, with a focus on performance and scalability.
- - **Database Management**: Experienced in using SQL Server and Entity Framework for data modeling, querying, and optimization.
- - **User Authentication**: Skilled in implementing Identity for secure user authentication and role-based access control.
- - **Frontend Development**: Knowledgeable in integrating responsive UI frameworks like Bootstrap and enhancing user experiences with JavaScript and AJAX.
- - **Version Control**: Familiar with Git for source code management and collaboration in team environments.
- - **Agile Methodologies**: Experienced in Agile development practices, participating in sprints and contributing to continuous integration and deployment workflows.

- I am passionate about leveraging technology to solve complex problems and deliver high-quality software solutions.

WORK EXPERIENCE

.Net Developer

Bornadel   2022-2024

- The project involved developing a scalable online learning platform using ASP.NET Core 8, designed to deliver educational content seamlessly to users. With a focus on security, performance, and user engagement, the platform integrates role-based access control, responsive UI elements, and optimized backend services for a smooth user experience.

-
- **Key Responsibilities:**
- - Developed backend services using ASP.NET Core 8, Entity Framework, and Identity to manage user authentication and role-based authorization.
- - Optimized SQL Server queries and implemented caching to boost API response times and improve data retrieval performance.
- - Created and maintained RESTful APIs for front-end integration and third-party service communication.
- - Collaborated in Agile sprints, working with cross-functional teams to ensure timely, efficient feature delivery.
- - Enhanced UI responsiveness with JavaScript and AJAX, providing a smoother user experience.
- - Debugged and resolved code issues, maintaining platform reliability and stability.
