## PROFILE

I started programming in 2019 with C++ and after mastering Python. In 2020, I got acquainted with the C# language and started learning it, and then I started learning the .NET framework. From 2022, I started my career as a .net programmer and with an internship at Shatel Company. After a few months, I joined Ravagh Saze as a junior programmer, and now I have done several projects as a freelancer. During these years, I have gained experience in the field of .net framework (MVC) and the implementation of various APIs and tokens, etc.
